

MIDTERM

Monday, October 11, 2010
8:56 AM

1. $i1 = -5, i2 = 66$ } swap fun
 $i1 = 66, i2 = -5$ }

2. program tracing

numbers:

1	1	2	4	8	0	0	0	0	0
0	1	2	3	4	5	6	7	8	9

^

j	i
0	0, 1, 2, 3, 4, 5, 6, 7, 8, 9
1	0, 1, 2, 3, 4, 5, 6, 7, 8, 9
2	0, 1, 2, 3, 4, 5, 6, 7, 8, 9
3	0, 1, 2, 3, 4, 5, 6, 7, 8, 9
4	0, 1, 2, 3, 4, 5, 6, 7, 8, 9
⋮	

ANS:

1 1 2 4 8 16 32 64 128 256

3. write a program

#include <stdio.h>

```
int main(void)
{
```

```
    float f, c;
```

```
    printf("Enter temp (F): \n");
    scanf("%f", &f);
```

```
    // convert fahrenheit to celsius
    c = (f - 32.0) / 1.8;
```

```
    printf("Temp (C) = \n%.0f", c);
```

```
    return 0;
```

```
}
```

4. function

```
int findmin (int A[], int size)
```

```
{
```

```
    int i, minVal = A[0];
```

```
for (i=0; i < size; i++)
    if (A[i] < minVal) minVal = A[i];
```

```
return minVal;
```

```
}
```

in 211
analysis of algorithms

8. Calc. average:

```
float mean (float A[], int n)
```

```
{ int i;
```

```
float sum = 0.0;
```

```
for (i=0; i < n; i++)
```

```
    sum += A[i];
```

```
sum /= (float)n;
```

```
return (sum);
```

```
}
```

given input size n
(i.e. list of n integers)

How long does the above
search alg. take?

how many operations?
or how many of the n
items need to be inspected?

Ans: $O(n)$ — "big oh"

"on the order of"

is $O(n)$ good?

if linear, not bad,
better than $O(n^2)$

not as good as $O(\lg n)$

for image of $n \times n$ size

this takes
 $O(n^2)$

can improve on the SFU

←→
pay-pay to find am/pms
 $\Rightarrow O(\lg n)$

$$6. \quad 7, \begin{pmatrix} 4 \\ 1 \\ 1 \end{pmatrix}, \begin{pmatrix} -2 \\ 3 \\ 1 \end{pmatrix}$$

7 Q-P

8. Declare ptr to fun

int (* pfun) (int, int); // declaration

9. double (* hits) (---)

↑
hits hits "morphs" into

many (poly) instances \Rightarrow polymorphism

10. void list_add (list_t * list, void * data)
(link_t *)

list_init {
link_t * new = malloc(sizeof(link_t));
new->next = NULL;
new->data = data;

if (list->head == NULL)
list->head = new;

else

do

list → tail → next = new

list → tail = new ;

}
