

3D Eye Movement Analysis for VR Visual Inspection Training: Duchowski et al.

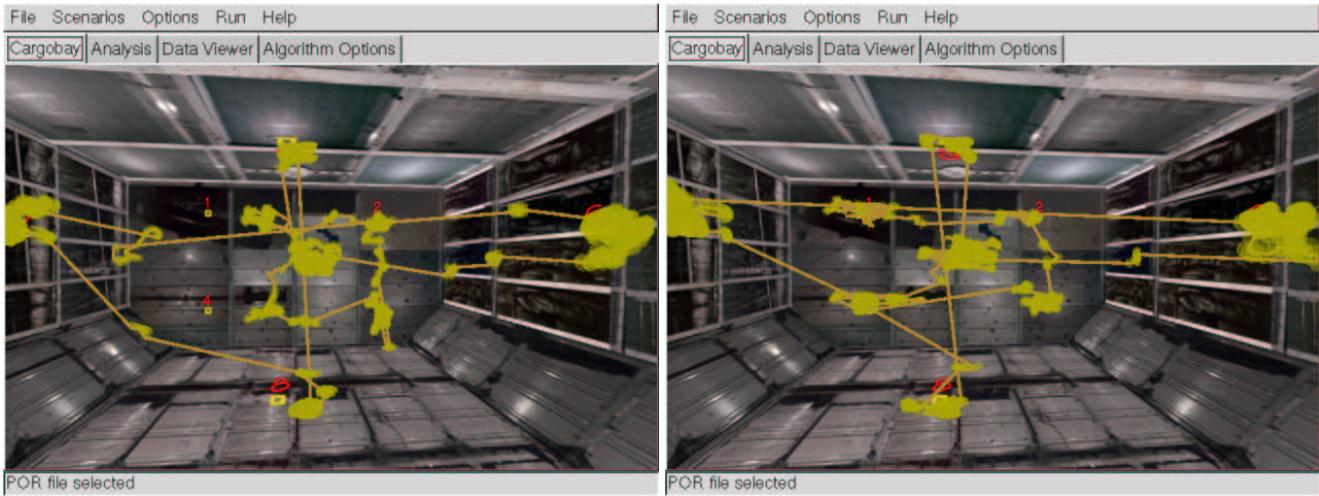

Figure 10: Detected fixations (2-tap vel. filter, ungrouped) prior to (a, left), and following (b, right) binocular scale factor adjustment.

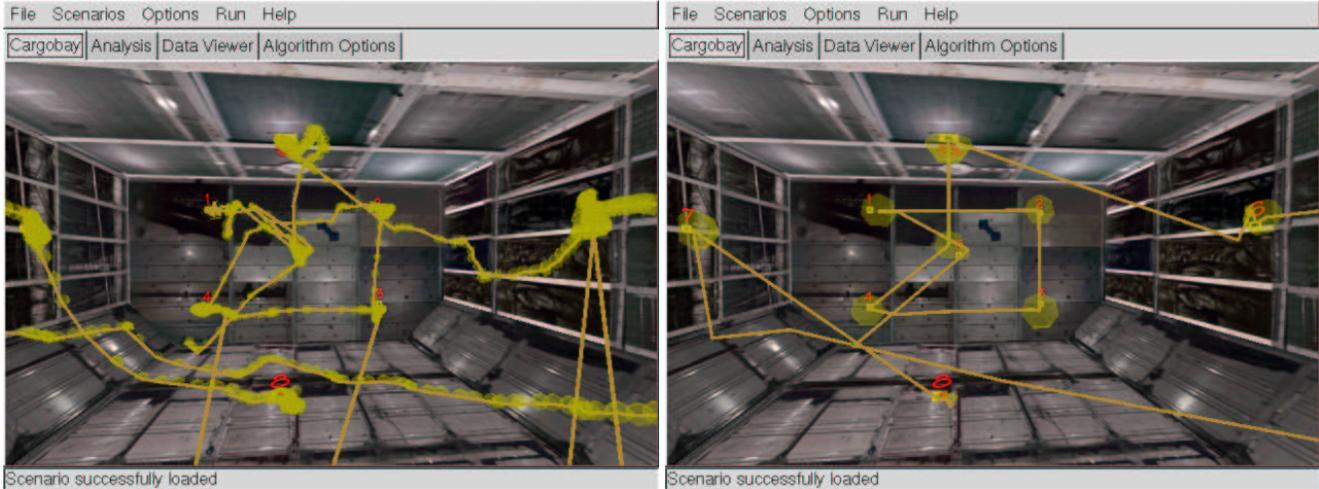

Figure 11: Raw data (a, left), 2-tap velocity-based analysis (b, right).

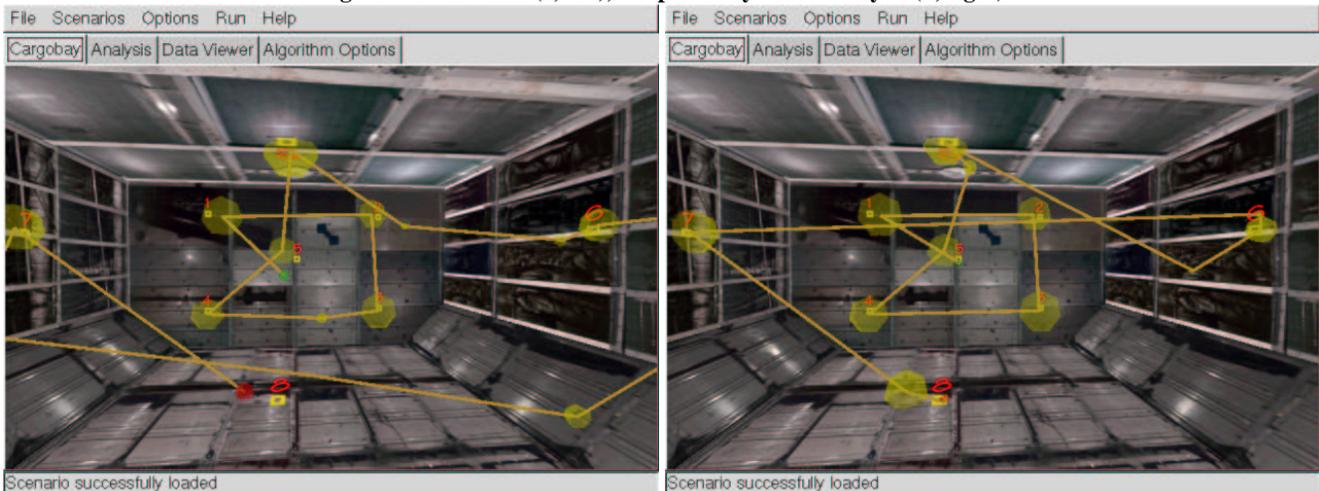

Figure 12: Acceleration-based (5-tap) analysis, with (a, left) adaptive thresholding, and (b, right), without.
